

New Product Release

AE4016 820mm Flexible Slimline 6dBi UHF CB Antenna

3rd November 2020

GME is proud to launch the newest addition to our range of antennas, the AE4016. This rugged flexible antenna is Australian designed and manufactured as a slimline antenna to suit the demands of the Off-Road and Agriculture market.

The AE4016 has been developed as a highly flexible 6dBi UHF CB Antenna to suit the needs of ATV's, 4WD's and Agricultural vehicles when travelling in rough terrain.

This antenna is packaged with a mounting base, and 5 meters of low loss coaxial cable terminated with an FME connection. Specially designed to be ground independent with a unique impedance transformer that allows for the whip to be removed from the base reducing clearance issues when mounted high on vehicles. The highly flexible whip reduces the chance of damage when travelling in rugged terrain.

GME has a specialised design team with the ability to develop application-specific antenna products. With a purpose-built facility based in Sydney, GME continues our on-going commitment and dedication to local Australian manufacturing. Local manufacturing ensures GME is able to produce the highest quality communications equipment tailored to the harsh Australian landscape.
