

New Product Release

580mm Multi-band Cellular Antenna

AT4704BA

10th October 2022

GME is proud to launch the newest addition to our AE4700 series of Cellular antennas, the **AT4704BA**. This heavy-duty cellular antenna has been designed, engineered, and manufactured in Australia to meet the demanding conditions of the harsh Australian outback.

The AT4704BA is a multi-band cellular antenna delivering optimal performance to suit the 4G LTE networks common around the fringes of rural areas.

Using common external mechanical components, the AT4704BA has been designed to match one of our most popular UHF CB antennas, the AE4704B.

GME has a specialised antenna design team with the ability to develop application-specific antenna products. With a purpose-built facility based in Sydney, GME continues our on-going commitment and dedication to local Australian manufacturing.

Local manufacturing ensures GME can produce the highest quality communications equipment tailored to the unique requirements of the Australian market.

New Product Release

580mm Multi-band Cellular Antenna

AT4704BA

Key Specs

- Black Fibreglass Radome
- Heavy Duty Spring Base
- Detachable Whip
- Ground Independent Design
- Pre-terminated SMA Connection
- 700, 850, 900, 1800-2100MHz
- 2.5 - 5 dBi Gain
- Length: 580mm

In the box

- Antenna Whip (**AW4704BCEL**)
- Heavy Duty Spring Base & Lead Assembly - SMA Connector (**AS004BSCCEL**)
